

## **Preventive Care Services**

The screenings and immunizations listed in this summary include services required by healthcare reform (the Patient Protection and Affordable Care Act).

For plan years beginning on or after September 23, 2010, non-grandfathered health plans¹ must cover these routine immunizations and other services that are recommended by the United States Preventive Services Task Force A or B, and by other organizations such as Bright Futures, endorsed by the American Academy of Pediatrics. Please note: Some services and products may be subject to age, gender or other restrictions. Refer to USPreventiveServicesTaskForce.org or Healthcare.org for details. In addition, some prescription drugs or services may be subject to medical management techniques, such as prior authorization, quantity limits, etc.

If these services are performed by a network provider, members cannot be charged a copayment, coinsurance or deductible. Out-of-network charges may apply if the services are performed by a non-network provider.

If you have questions about these recommended screenings and immunizations, please contact your Medical Mutual representative or broker. He or she can also give you more details about the recommended frequency of these services. You can also call our Customer Care Center at the number on your identification card for more information.

## **Please Note**

This is a summary of the Affordable Care Act Preventive Care requirements and is not intended to be an exhaustive list. This list is subject to change upon issuance of additional regulations or guidance. The preventive care services listed on this flier are for your information only. They are not intended to be, and should not substitute for, professional medical advice, diagnosis or treatment from your treating medical professional. Decisions about care need to be individualized and should be made in concert with treating medical professionals. The information provided does not establish or imply coverage for any particular treatment or service. Any recommended treatment or services will be determined based on your eligibility and coverage under the specific terms and conditions of your benefit plan.

## **Footnotes**

- 1. If you do not know your health plan's grandfathered status, contact our Customer Care Center at the number on your identification card.
- 2. To receive 100 percent coverage for these medications (i.e., no out-of-pocket cost), members must get a prescription from their healthcare provider and present it at the pharmacy, even if the medication is available over the counter without a prescription.

An ounce of prevention is worth a pound of cure. Getting preventive care is one of the most important steps our members can take to manage their health. Routine preventive care can identify and address risk factors before they lead to illness. When illness is prevented, it helps reduce healthcare costs. Members should work with their healthcare providers, who can help them follow these guidelines and address their specific health concerns.
