

An additional benefit
when you need it:

The Special Health Care Needs Benefit from Delta Dental

For 6.5 million people in the U.S. with intellectual or developmental disabilities, oral health care can be inaccessible or overwhelming. Delta Dental is changing that.

Who qualifies for this benefit?

Effective January 1, 2024, your Delta Dental of New Jersey and Connecticut group benefits plan* will include an enhanced benefit for covered members (children and adults) with a qualifying special health care need.

What is included?

- Additional dental examinations and/or consultations that can be beneficial prior to treatment to help patients learn what to expect and what is needed for a successful dental appointment.
- Up to four total dental cleanings in a benefit year.
- Treatment delivery modifications (including anesthesia) necessary for dental staff to provide oral health care for patients with sensory sensitivities, behavioral challenges, severe anxiety, or other barriers to treatment.

How do I/my spouse/my dependent use this benefit?

- Members with a qualifying special health care need should let their dentist know that their group Delta Dental plan includes the Special Health Care Needs Benefit and that they have a qualifying special health care need.
- To help your dentist better understand the benefit and how to bill Delta Dental for services provided, we suggest you or your provider download (or scan the below QR code) the **Provider Focused Special Health Care Needs** flyer.

Download the [Provider Focused Special Health Care Needs flyer](#) or scan this QR code.

Questions?

Please call the Delta Dental Customer Service Department at **800-452-9310**.

*Does not apply to Flagship, DeltaCare® USA, or Individual and Family Plans.

What are special health care needs?

As defined by the American Academy of Pediatric Dentistry, special health care needs include any physical, developmental, mental, sensory, behavioral, cognitive, or emotional impairment or limiting condition that requires medical management, health care intervention, and/or use of specialized services or programs. The condition may impact people of any age, may be congenital, developmental, or acquired through disease, trauma or environmental cause, and may impose limitations in performing daily self-maintenance activities or substantial limitations in a major life activity.
